

Armin Khoshbin

Developer @ Neto

📍 Brisbane, Australia

About Me

I am passionate about technology and almost anything related to Web. It is amazing how technologies are changing our lifestyle on a daily basis. The Tech industry is evolving at a rapid pace and it is becoming harder to catch up with the latest trends in this sector. I am always looking for opportunities to connect with like-minded people, expand my knowledge further and apply them to real-world problems. After all there is no better feeling than watching something you've worked so hard and built being used by people and it actually brings value to their life and impact their business/livelihood day to day.

Experience

Developer @ Neto eCommerce Solutions

Jan 2016 - Present

Working within cross-functional teams to deliver new features and fix issues/bugs reported by customers following Agile methodology. Owning the code from top to bottom meaning the team will be responsible for infrastructure management all the way to development of the application code that's being released and automating the deployment process.

Web Developer @ BDS.com.au

July 2014 - Dec 2015

Working as a PHP/JavaScript developer with a team of highly experienced professionals at a Brisbane-based startup Zippy.com.au on the development side of projects.

Web Developer @ Queensland University of Technology

Feb 2014 - May 2014

Development of functional Information System for a children's hospital as part of a university-based project.

Process Worker @ City Beach Australia

June 2013 - July 2014
